Centron	Aromatic Amine	Standard	1-1/2 - 6	212	P, I, T, D	O, W, G, C, H	500 - 3500	1250 3500	800 1000 3500	800 3000	800 800 3000	800 500 1500	500 1500	500 1000				SP		Flange
Centron	Aromatic Amine	API 15HR	1-1/2 - 6	212	P, I, T, D	O, W, G, C, H	500 - 2000	1000 2000	750 2000	750	500 500 2000	500 1250	500 500 1250	500 750				SP		Flange
Centron	Aromatic Amine	Standard	4 - 10	212	P, I, T, D	O, W, G, C, H	400 - 2500	2000	2000	2000	2000	800 2500	1250	800 2500	500 <sup>6</sup> 1800	500 <sup>8</sup> 2000	400 <sup>10</sup> 800	SPH	SPH-HP	Flange
Centron	Aromatic Amine	API 15HR	4 - 10	212	P, I, T, D	O, W, G, C, H	500 - 2000					750		500 2000	500 <sup>6</sup> 1500	500 <sup>8</sup> 1750	500 <sup>10</sup> 750	SPH	SPH-HP	Flange
Star	Aromatic Amine	API 15HR	1-1/2 - 8	212	P, I, T, D	O, W, G, C, H	500 - 2500	1750	1000	750	750	750	750	500	500	1150	150	ACT	PGT	Flange
Star	Aromatic Amine	API 15HR	8 - 12	212	P, I, T, D	O, W, G, C, H	1000 - 2000	2500	2500	2500	2500	2000	1500	1750	1250 1000	1000	1000	SSS-HP		Flange
									1100	1100	750	1100 <sup>3</sup>	750 <sup>4</sup>	500 <sup>5</sup>	2000 500 <sup>7</sup>	1500 500 <sup>9</sup>	1250		Wald Oth -	
Fiberspar (E)	Anhydride	API 15HR, 15S (RP)	2-6-1/2	140	P, I, T, D, R	O, W, G, C, H	500 - 3500		3500 1100	3500 1100	3500 700	2750 1100 <sup>3</sup>	2750 700 <sup>4</sup>	2250 470 <sup>5</sup>	1500 470 <sup>7</sup>	1500 470 <sup>9</sup>		8rd, NPT	Weld, Other	Flange
Fiberspar (X)	Anhydride	API 15HR, 15S (RP)	2-6-1/2	180	P, I, T, D, R	O, W, G, C, H	470 - 3300		3300 975	3300 975	3300 650	2600 975 <sup>3</sup>	2600 650⁴	2250 425⁵	1400 425 <sup>7</sup>	1400 425 <sup>9</sup>		8rd, NPT	Weld, Other	Flange
Fiberspar (XT)	Anhydride	API 15HR, 15S (RP)	2 - 6-1/2	203	P, I, T, D, R	W	425 - 3100		3100	3100	3100	2425	2425	2000	1325	1325		8rd, NPT	Weld, Other	Flange

#### Notes:

Applications: P - Production Flow Lines; I - Injection Lines; T - Transfer Lines; D - Disposal Lines; R - Rehabilitation of Corroded Lines

Media: O - Oil; W - Water (Produced, Salt, Fresh); G - Natural Gas; C - CO, or Fluids Containing CO,; H - Sour Services (Fluids Containing H, S);

C<sup>1</sup> - Temperature Limited to 125°F; C<sup>2</sup> - Temperature Limited to 185°F; H<sup>1</sup> - H<sub>2</sub>S Concentration Limited to 3%

**Notes on Diameters:** <sup>3</sup>Dia. = 3 1/2; <sup>4</sup>Dia. = 4; <sup>5</sup>Dia. = 5; <sup>6</sup>Dia. = 7 3/4; <sup>7</sup>Dia. = 6; <sup>8</sup>Dia. = 8; <sup>9</sup>Dia. = 6 1/2; <sup>10</sup>Dia. = 10 (RP) indicates Recommended Practice

### **Product Series**

<ul> <li>Star Anhydride - ACT or PGT</li> <li>Thread design per API Specification 5B</li> <li>Full line of filament wound fittings</li> <li>Standard or API design</li> </ul>	Applications: Suitable for all, sweet or mildly sour, oil field services with limited CO <sub>2</sub> content Features: Minimum 20 year service life at full rating based on 150°F design temperature and nominal (standard) or minimum (API) wall thickness
Star Anhydride - SSS-HP         • 2 thread-per-inch mechanical joint with O-ring seal         • Filament wound elbows, couplings, and flanges available         • Standard or API design	Applications: Designed for transfer of high volumes of fluid at high pressure. Fast assembly joint. Features: Full pressure rating up to 150°F
<ul> <li>Centron Anhydride - CEN</li> <li>4 thread-per-inch modified ACME thread with O-ring seal</li> <li>Full line of filament wound fittings</li> <li>Standard or API design</li> </ul>	Applications: Low pressure, fast-assembly, flowline product for general service piping needs; larger than normal ID Features: Not intended for gas service. Sulfur-cured O-ring not recommended for sour service
<ul> <li>Centron Anhydride - SP, SPH, SPH-HP</li> <li>4 thread-per-inch round form (SP) or buttress (SPH) sealing thread secondary O-ring seal</li> <li>Full line of filament wound fittings</li> </ul>	Applications: Proprietary joint designs for fast, reliable assembly Features: Position-based thread assembly. Suitable for gas service
<ul> <li>Star Aliphatic Amine - ACT</li> <li>Similar to Anhydride cured offering, with higher performance characteristics with regards to temperature and resistance to CO<sub>2</sub> and H<sub>2</sub>S exposures</li> <li>Standard or API design</li> </ul>	Applications: Designed for fast, reliable assembly Features: Position-based thread assembly. Suitable for gas service
<ul> <li>Star Aliphatic Amine - SSS</li> <li>2 thread-per-inch mechanical joint with O-ring seal</li> <li>Full line of filament wound fittings</li> <li>Standard design only</li> </ul>	Applications: Designed for high volume lines at high temperatures; fast assembly joint well suited for long lines Features: Standard size O-ring used. A variety of elastomer materials are available
<ul> <li>Centron Aromatic Amine - CEN</li> <li>4 thread-per-inch modified ACME thread with O-ring seal</li> <li>Higher temperature rated version of Anhydride cured product with higher performance in CO<sub>2</sub> and H<sub>2</sub>S environments</li> </ul>	Applications: Provided for transfer of high temperature, more corrosive fluid handling lines Features: Temperature performance of O-ring material should be considered during selection
<ul> <li>Centron Aromatic Amine - SP, SPH, SPH-HP</li> <li>4 thread-per-inch round form (SP) or buttress (SPH) sealing thread with secondary O-ring seal</li> <li>Standard or API design</li> </ul>	Applications: Combines characteristics of double-seal joint, high pressure and high temperature designs Features: Highly regarded product for wide variety of upper-end services up to 212°F
<ul> <li>Star Aromatic Amine - ACT, PGT</li> <li>Premium product available with ACT and PGT joint</li> <li>Full line of filament wound fittings</li> <li>API design only</li> </ul>	Applications: Product of choice for severe service, regulated systems Features: Premium product line providing highest allowable operating temperature
<ul> <li>Star Aromatic Amine - SSS-HP</li> <li>2 thread-per-inch mechanical joint with O-ring seal</li> <li>Extended range product at upper end of available design and performance</li> <li>API design only</li> </ul>	Applications: Provide high flow capacity for hot, corrosive fluids in characteristically large systems Features: Product line expands the range of services covered by fiberglass pipe
<ul> <li>Fiberspar (E), (X) and (XT)</li> <li>High performance, only true Glass Reinforced Epoxy (GRE) spoolable line pipe product</li> <li>Designed with various grades of thermoplastics in bonded liner and formed jacket layers, enveloping the GRE structural wall</li> <li>Connectors employ positive grip on GRE layer and are designed to be reusable and are immune to viscoelastic creep which plagues other designs</li> </ul>	Applications: Product is rapidly deployed and is installed by Certified Installers thoroughly trained and tested by Fiber Glass Systems personnel Features: This is not thermoplastic pipe made stronger, it is GRE pipe made spoolable

# Standard Design and API Design

Long-term regression testing is done on a set of identical samples with pressure held steady at predetermined stress levels to cause short-term, medium-term and long-term failures, according to ASTM D2992 - Procedure B. Statistical analysis of the time vs. stress data points is performed and plotted on log/log scales, including least-squares fit of the regression line, extrapolation to the design life, calculation of variance to qualify the consistency of the data and upper and lower confidence limits. Standard design utilizes a Long Term Hydrostatic Strength (LTHS) at 100,000 hours (11.4 years) or 175,200 hours (20 years) and applies a 0.5 or 0.67 Service Factor to determine the Hydrostatic Design Stress (HDS), which is then applied to the nominal wall thickness of the pipe to determine its pressure rating. API design uses a 0.67 Service Factor at a 20-year design life, utilizing the 95% Lower Confidence Limit (LCL), and applies it to the minimum wall thickness. For a detailed explanation, please contact Fiber Glass Systems Application Engineering. Standard design product is 100% factory hydro tested at 1.25 times its rated pressure. API design product is 100% factory hydro tested at 1.50 times its rated pressure.

#### ACT

Molded, 8 threads per inch using a graphite, ceramic and epoxy composite for high performance applications. Threads conform to API Standard 5B (14th Edition).

#### PGT

Ground threads produced with diamond-coated, profiled grinding wheels and numerical controlled grinding equipment. API conformance as described for ACT.

#### SP

Ground, round-form, 4 threads per inch threads providing a position-based seal, complemented with an o-ring seal.

### SPH, SPH-HP

Ground, trapezoidal-form (buttress), 4 threads per inch threads providing a high strength, position-based seal, complemented with an o-ring seal.

Note: All female fiberglass threads are made on profile tooling to form mating threads to the male threads as described above.

### SSS, SSS-HP

"STAR Super Seal" heavy-duty, modified ACME (non-sealing), 2 thread per inch threads with an o-ring seal.

### CEN

Centron CEN is similar to the SSS with 4 threads per inch.

#### Flange

ANSI 16.5 compliant flange connection for full range of pressure ratings. Flanges for STAR and Centron products have internal female threads and assemble on to male threaded pipe ends or threaded pipe nipples. Fiberspar flanged Service End Connectors are metallic and are welded to body of the connectors.

### NPT Threads or Weld-Ends

Unique to Fiberspar within Fiber Glass Systems, pipe to pipe connectors are used when connecting pieces of spoolable pipe together, whether for extending the length of the line or for repairing a damaged section.
