

FIBERSPAR TECH NOTES

Product, service and cost savings information from the leader in spoolable pipeline systems

Now you can choose Fiberspar for every remediation project

Spoolable, composite LinePipe™ provides an exceptionally cost-effective way to remediate old or damaged pipelines with minimal excavation or surface disturbance. And now, Fiberspar is the only company with the full breadth of installation processes for remediation available in-house.

We now offer customers a choice of our patented push/pull injector installation, wireline installation (pull technology), or for more complex or extremely long-length rehabilitation applications, a combination of both push and pull technology is available.

Unrivalled remediation experience

Here are a few reasons why Fiberspar leads in pipeline rehabilitation:

- Fiberspar has completed more than 1,100 miles (1,770 km) of pipeline remediation to date, more than any other company.
- We operate the only pushing units in the industry designed specifically to safely install composite pipe.
- Fiberspar offers the most up-to-date patented push/pull technology ideally suited to lightweight spoolable LinePipe.

With installation technologies and expertise to address virtually any remediation challenge, Fiberspar is truly the preferred provider for maintenance-free pipe, installation and remediation services.

There is much more you should know about the advantages of Fiberspar LinePipe. Contact us for assistance with your specific requirements, or download our Engineering or Installation guides at www.fiberspar.com.
